CONSULTATIVE

approach to packaging & handling

PALLETBIZ HAS A UNIQUE GO-TO-MARKET MODEL WHICH WE LIKE TO CALL A CONSULTATIVE APPROACH TO GLOBAL SOURCING & SALES WITHIN THE AREA OF PACKAGING & HANDLING.

INDUSTRY CHALLENGE

Supply chain structure

There are now over four billion pallets in use across the globe and international shipping accounts for 90% of the world's trade, much of which requires palletization. Packaging and Handling solutions can be very complex and costly. Often, wrong processes and handling products are used, which leads to an inefficient and fragmented supply chain structure.

Besides the standard considerations for any business, the market industry driven regulations further impose logistical limitations of different nature.

At PalletBiz, we have dedicated resources to investigating and identifying the different factors that influence such a structure and are eager to help. Read more to find out about our key areas for improvement.

CONSULTATIVE APPROACH

Analysis – No-Cure-No-Pay

We investigate and analyse key areas of your packaging & handling business operations at a “no-cure-no-pay” basis.

We further look into:

- Your Industry and type of goods transported, because they play a big role in the transportation
